

# Probiotic Foods *for* Pets

Daily vitamins  
*and* minerals *from food*  
in an easily absorbable  
probiotic blend.

## A special blend for your special friend.

Probiotic Foods For Pets provides your animals with a balance of vitamins, minerals and amino acids in an absorbable form. All broken down by a super-culture of probiotics.

### Why probiotics?

Like humans, your pets need nutrition that is not found in processed foods.

Probiotic Foods for Pets provides your animals with a balance of vitamins, minerals and amino acids in an absorbable form all broken down by a super-culture of probiotics.

Natures provides the answers. Take the lion for example. What is the diet of a lion? Most of us would say meat. But lions don't eat carnivores, they eat herbivores. The first thing they do is eat is the gut that contains

pre-digested grasses and bacteria (probiotics).

Herbivores eat grass and their digestive system breaks down their food to extract the nutrients. The digestion process has been completed by the time the lion eats the gut, therefore, the lion is eating pre-digested food (probiotics), as nature intended.

This is exactly what we present with our Probiotic Foods for Pets. Pre-digested foods ready for easy absorption by your pets.

## Certified Organic Probiotic Foods for Pets

The specially selected foods on the label are fed to our super-culture of probiotics that break down the food for up to three weeks. The end result is a highly nutritious food product that is easily absorbed.

You can give your pet Probiotic Foods for Pets daily, knowing with confidence they are made without **artificial flavours or colours, dairy, preservatives, sweeteners, or GMOs. Certified Organic ingredients.**

Sugars	0.77g	15.4g
Fat Total	0.23g	4.6g
Fat Saturated	<0.05g	<1g
Sodium	12.6mg	252mg

## FAQs

**How much and how often do they need?** Sprinkle onto their morning food daily, they will love the taste! First time users start with 1/4 teaspoon and gradually increase to the recommended amount.

**Small Pet** ½ level tsp 1-2 g

**Medium Pet** 1 level tsp 2-3 g

**Large Pet** 1 heaped tsp 5-6 g

**How can I tell if it's working?**

Many pet owners notice a better quality stool, the litter tray is less smelly, and the coats of their pets are more shiny. Watch and see the difference in your pet after they start taking the nutritional probiotics.

**What animals are they suitable for?**

Probiotic Foods are suitable for any living creature! From dogs, cats, horses, birds, fish, farm animals, Tasmanian devils or reptiles. Every living thing needs probiotics to survive—no human or animal can survive without a gut full of healthy probiotics. Most diseases can be related to a compromised gut, therefore it is vital our much-loved family members are receiving nutrition.

**Can humans take Probiotic Foods for Pets?**

Yes, safe for human consumption!

---

*"All six of our pets are having profound changes with Probiotic Foods for Pets. They have regained weight (or lost it!), healthier coats, stools and temperament. Amazing results in two months!"*
